

SBI and Thermo Fisher Scientific!

January 1, 2009

SBI is proud to partner with **Thermo Fisher Scientific**, the world's largest manufacturer of laboratory furniture and fume hoods to offer customers cutting-edge products and technology for their labs, healthcare and research facilities.

"SBI is committed to partnering with industry leaders, whose dedication to quality, service and sustainability match our own," says Raymond Near, SBI President, "Thermo Fisher Scientific is consistently recognized for excellence in laboratory projects and SBI is eager to offer their products to our customers."

About Thermo Fisher Scientific:

- Thermo Fisher Scientific, the world's largest manufacturer of laboratory furniture and fume hoods is located in Two Rivers, Wisconsin - a facility that has been developing furniture solutions since 1880.
- Thermo Fisher Scientific enables customers to make the world healthier, cleaner and safer by providing analytical equipment, reagents and consumables, software and services for research, analysis, discovery and diagnostics.
- Thermo Fisher offers the most comprehensive selection of Thermo Scientific Hamilton laboratory furniture, fume hoods, options and accessories available; standard product offerings consists of more than 70,000 standard casework and fume hoods.
- Thermo Fisher capabilities are highly automated with over 60 CNC machines and other programmable equipment; with the flexibility to manufacture both standard and customized products of consistently high quality and deliver it on time to customers.
- Thermo Fisher uses high performance chemical resistant powder coat finishes on steel products designed to meet the rigorous demands of the laboratory environment. They self manufacture Hamilton laboratory wood casework, steel casework, stainless steel casework, adaptable lab furniture systems and fume hoods.
