DEALER NOTICE

Attention: All Mott Manufacturing Dealers
RE: LED Lights Now Standard On All Fume Hood Models

Mott is pleased to announce, that effective immediately, all new fume hoods will receive energy efficient LED lights as standard. The high output LED lights will replace the fluorescent lights that were previously provided, with no change to the price. The fixture is separated from the fume hood chamber by a sealed laminated safety glass lens. Fume hoods 96" wide and larger will receive two light fixtures. Our LED light supports 0-10 volt dimming when provided with an optional dimming switch; contact Mott for details. This LED light is included in our fume hood UL listing.

Specifications:

- **Light Color:** 4000k
- **Length:** 24" (609mm)
- **Width:** 3.90" (99mm)
- **Height:** 3.36" (85mm)
- **LED Spacing:** .398" (10mm)
- **Efficacy:** 120 lumens/watt
- **Light Output:** 5900 lumens
- **Illuminance:** 100 foot-candles to the work surface on bench fume hoods
- **Voltage Rating:** 120-277 volts AC at 50-60 hertz
- **Estimated Life Rating:** 50,000 hours, with 85% luminous intensity retention

Checking the LED light check box on the data sheet is no longer required.

For continuation of phased projects that require fluorescent lights please advise your Sales Coordinator and please indicate this on the datasheet.
